Development of an event ticket based web application-

Main Functionalities:

1. Sign up/in, (Different signups for admin, clients and event organizers)
2. For signup/login clients please try an use Auth0
3. Create Events and set ticket price,
4. 3% of ticket price will go to the owner's account(Should be configurable in admin dashboard),
5. Share their events(Facebook, Twitter, Instagram etc..),
6. Add tags,
7. Add tickets(Free, paid and invite only tickets like in tix.africa),
8. Ticket forms questions,
9. Selling tickets,
10. Payment Methods Integration (M-pesa, PayPal, Stripe),
11. Dynamic admin panel with all information(one dashboard for client, one dashboard for vendor, one dashboard for admin)
12. Some other features.
13. Admin Dashboard has all functionalities to edit any event
14. Dashboards should have statistics(number views, clicks, etc..)
15. Most viewed events should be shown on the top of the event landing page(Like in figma the main page)
16. Subdomain functionality
17. Event organizers should be able to add Youtube video, maps etc.. just like eventbrite
18. Please check eventbrite for additional features

Feel free to add features you think will be interesting and we can talk about that. If it's a good idea, I won't mind adding more money for that. So please be creative.

- PS: I will send you our brand colors etc.. so you can use them.

Web app design:

1. Frontend: Figma/Html files provided (Already provided)
2. Backend: Similar to tix africa (Already provided)
3. Auth0 credentials
4. Brand guidelines
